To whom it may concern:

Approximately four (4) years ago I engaged Kevin Malone of Mountain Woodworks to build the dream cabin for myself and my family. We wanted a high quality cabin with superior workmanship. A cabin that would be multi-generational, a place for my family to enjoy long after my wife and I are gone. Now that the cabin is completed, we have had many of our friends and other people who have owned cabins comment on the tremendous quality of work. My wife and I are very pleased with the workmanship that has been provided us by Kevin. Every detail of the cabin is of the finest workmanship. We have found Kevin to be very pleasant to work with, he has been very conscientious of the budget involved. Kevin has been very creative with all aspects of the cabin and its surroundings. He has done an excellent job.

I can give, without hesitation, Kevin Malone and Mountain Woodworks my highest recommendation for anyone wanting to build a log cabin.

Best regards,

Matt R. Sansom
